

Determining What Charger You Need

Do you need help determining what electric vehicle charging solution is best for you?

Follow these three easy steps.

1 BOOK YOUR SITE ASSESSMENT

The first step in determining what charger you need is to book a site assessment with Chargemaster.

To book your site assessment*, contact us at info@chargemaster.co.nz or via our website. We will work with you to schedule a time convenient to you.

2 SITE ASSESSMENT

During the site assessment, one of our technicians will visit your property and assess your electrical capacity, location of the charging station, and any other relevant factors to determine what charger will best suit your needs. We will also consider factors such as your vehicle, charging requirements and budget.

Based on this analysis, we will recommend a charger that meets your needs and provide you with a detailed quote for hardware and installation.

3 REQUEST INSTALLATION

Once you have received the quote and are ready to proceed, you can request the installation of your charger at a time convenient to you.

During the installation, our technician will perform testing and commissioning to ensure the charger is working and meets all safety standards. Our technician will also provide you with the necessary training and support.

* Site assessment fees apply. Residential site assessments are \$95 + GST, of which is redeemable upon acceptance of the quote. Commercial site assessment fees vary, reach out to our team for more information.

Support

Do you have any questions about Chargemaster's electric vehicle charging solutions?
